4K UHD with LED backlight

The 3840 x 2160 resolution of this LED backlight monitor delivers excellent detail, making it perfect for advanced 4K productivity and multimedia applications. LED backlight monitors also consume less power and last longer than those with CCFL lamps.

Daisy chain

This feature allows user to build a high-definition video wall more easily through integrated DP output port. DV865K support up to 2 x 3 multi-displays in 4K resolution via only one signal source without splitters

Remote control

This feature provides the ability of remote control all displays via built-in RS-232 and RJ-45 interface with unique software. User can select input source, turn on PIP function, control audio volume, check display's ID when creating video wall, let user have all power to control from one central location.

24/7 non-stop operation

Acer digital signage DV865K is designed for long-term usage. Up to 30,000 hours of lifespan and auto cooling system make them have the ability to provide user 24/7 non-stop and reliable commercial display.

High brightness and color depth

With 500nits high brightness and 10-bit high color depth, Acer digital signage DV865K is able to offer viewers a more engaging experience by crystal-clear images with true to life color.

Wide viewing angle

Acer digital signage DV865K series deliver true-to-source colors without gray-level inversion or color inversion, even when viewed from angles as wide as 178°.
